

# Family Office Security Challenges

Modern family offices face complex security threats while managing trillions in assets globally.

by **Phil Wheaton**

# Cybersecurity Threats

## Attack Prevalence

43% suffered attacks in past two years

## Regional Impact

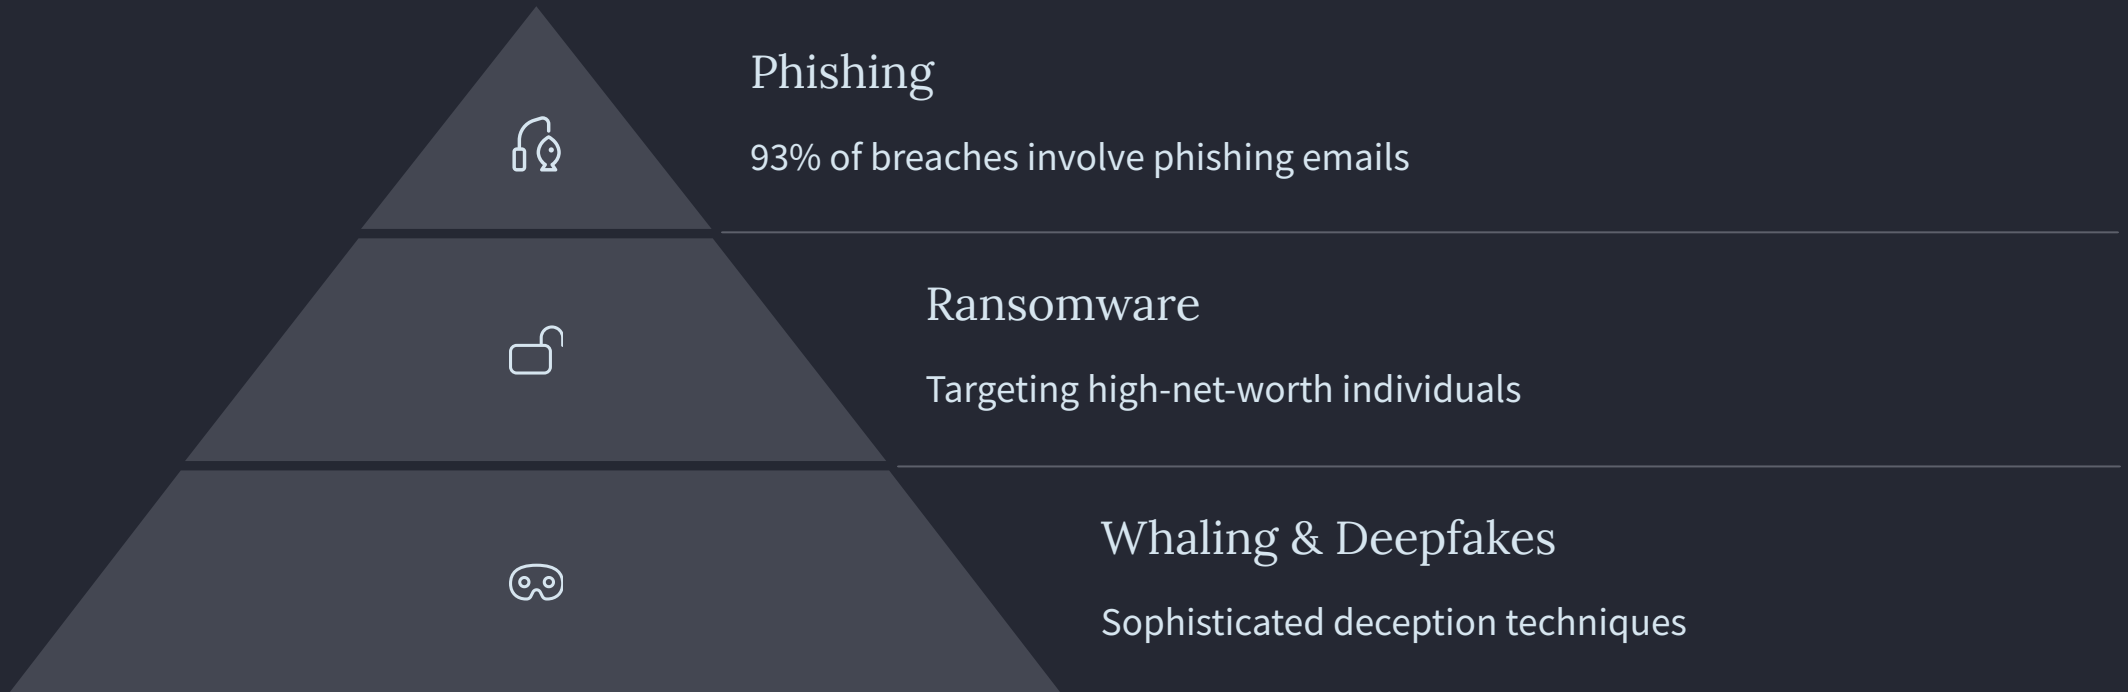

57% North America, 41% Europe, 24% Asia-Pacific

## Preparedness Gap

Only 26% have robust response plans

# Common Attack Vectors

# Cybersecurity Defense Framework

## Endpoint Protection

Secure devices with breach prevention

## Network Security

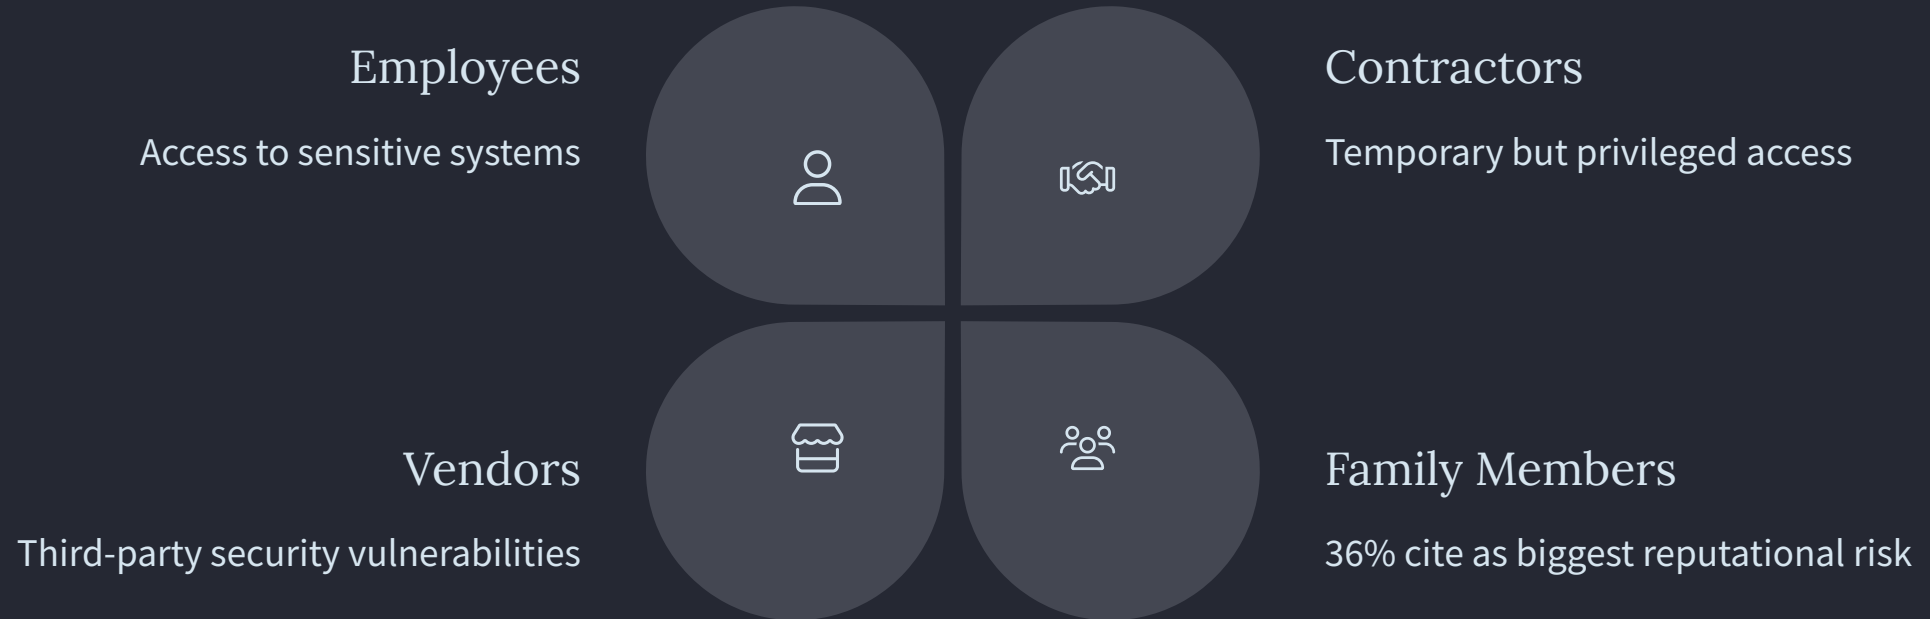

Vulnerability scanning and patches

## Identity Protection

Multi-factor authentication and training

# Insider Threats

# Insider Threat Mitigation

## Security Assessments

Only 37% reassess employee security profiles

## Training Programs

54% ensure all staff participate in security training

## Formal Management

Structured monitoring and response protocols

## Antifraud Services

Risk assessments and activity monitoring

# Physical Security Risks

## Personal Safety

Kidnapping and targeted attacks

## Property Security

Less than 50% evaluate physical risks

## Travel Threats

Express kidnapping and carjacking risks

## Extortion Attempts

Threats against individuals or property

# Physical Security Solutions

## Executive Protection

Specially trained personnel from security sectors

## Specialized Insurance

Kidnap and ransom policies with crisis response

## Crisis Management

Comprehensive procedures for security incidents

## Risk Assessment

Regular evaluation of vulnerabilities
